

# Fold-Up Solar Panels

## Portable Power Wherever You Go

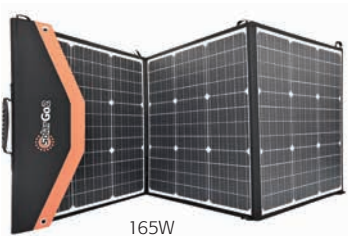

Our portable folding solar panels offer a lightweight, waterproof solution for charging a 12V battery on the move. Designed for tough off-grid environments, they're just as at home beside your caravan or campervan on a peaceful camping trip. Encased in durable, weather-resistant canvas, the panels protect high-efficiency A-grade solar cells, with all wiring precision-built for maximum performance.

A rugged 15A charge controller with a clear LCD display lets you monitor your charging at a glance.

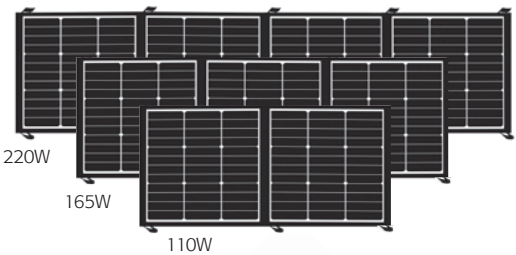

The fold-up design deploys in seconds, with built-in kickstands to help you angle the panel for the best sunlight. A range of optional connection cables ensures compatibility with most 12V battery systems and portable power stations. Each fold-up panel arrives pre-wired and ready to use, simply unfold, plug in and start charging.

Available in 110W, 165W, and 220W models to suit a range of power needs.

## Smart & Versatile Charging

The **included tough PWM charge controller** adds real capability to the kit, supporting **Lead Acid, Gel, AGM, Calcium, and Lithium Phosphate** batteries. It also features a lithium 'wake-up' mode to reactivate batteries whose BMS has shut down, along with a clear LCD display for quick, at a glance system monitoring.

WATT	DIMENSIONS	WEIGHT
110W	565 x 550 x 15mm (closed up)	3.7Kg
110W	1305 x 565 x 4mm (opened up)	3.7Kg
165W	565 x 550 x 20mm (closed up)	5.4Kg
165W	1855 x 565 x 4mm (opened up)	5.4Kg
220W	565 x 550 x 25mm (closed up)	8.6Kg
220W	2405 x 550 x 4mm (opened up)	8.6Kg

*Wherever your adventures take you, power up with confidence using our premium fold-up solar panels.*

## What's Included?

**Your choice of dependable SolarGo2 fold-up panel**

**The tough 15A PWM controller with LCD display**

**4m of cable from the panel to your battery**

**A set of tough crocodile connectors**

**Instruction manual**

## Key Features

- **Easy to Carry** Lightweight with a built-in handle for effortless transport.
- **Easy to Use** Simply plug and play with minimal setup.
- **Easy to Adjust** Position the panel to capture the best sunlight.
- **Easy to Connect** Includes crocodile clip cable with integral fuse.
- **Easy to Store** Compact and foldable for convenient storage.
- **Included Tough PWM 15A Controller** Tough but simple plug in controller with large LCD display.
- **4M Cable from Panel to Controller** UV protected cable to connect up your controller to the panel.
- **Tough and Durable** Designed to withstand all weather conditions.

## We have a range of accessories to complement your fold-up solar panel:

- **50A Anderson to ring terminal.** Permanently connect the supplied cable to your battery, giving you a quick plug-in/plug-out setup without ever needing direct access to the battery again.
- **50A Anderson to XT60, DC7909, DC5521 and small Anderson.** Ideal for charging power stations and other battery box systems directly from your fold-up panel.
- **50A Anderson to 50A Anderson extension cable.** Gives you an extra 5m of reach, allowing you to position your panel in the best sunlight without any loss of power.
- **XT60 to XT90 Adaptor.** Got an XT90 connection on your power station? No problem, this handy adaptor lets you connect your fold-up panel via the adaptor cable quickly and easily.
